8 Tips for Better Underwater Navigation | Scuba Diving Natural navigation requires you to use the physical contours and characteristics of the dive site to guide your way out and then find your way back, and learning to combine natural navigation with basic compass skills practically ensures you'll never get lost underwater. Here are eight steps for getting to the reef or wreck and back again. Navigation By the Numbers: How to Use a Compass | Scuba ... Unlike many scuba skills, compass navigation works the same in or out of the water. Practice the mechanics of setting and following a compass course on land before you try it underwater. Hold the correct arm position, set the reference marks over the North needle and follow the compass course for a dozen or so strides. Diver navigation - Wikipedia Diver navigation, termed "underwater navigation" by scuba divers, is a set of techniquesâ€”including observing natural features, the use of a compass, and surface observationsâ€”that divers use to navigate underwater.

Scuba Diving And Navigation: Ditch The Compass - DIVE.in Underwater navigation using Light. If you are not at too great a depth and visibility is good, you can use the way the light hits the water and the position of the sun to help get you oriented underwater. Navigation: Scuba Schools International: 9781597500128 ... Navigation [Scuba Schools International] on Amazon.com. *FREE* shipping on qualifying offers. Book by Scuba Schools International. Underwater Navigation How To Use A SCUBA Compass The most commonly used SCUBA navigation device is the compass. All divers have one and should carry it with them whenever they descend into the abyss. We all know that there is no such thing as an.
